

## COMMUNITY BASED VEHICLE (POSYANDU) - INTEGRATED HEALTHCARE CENTER

Our program also collaborated with community based vehicle ("Posyandu") - Integrated Healthcare Center to help and improve the welfare of the poor and the vulnerable in the community. The team supported the 'Kader Posyandu' (volunteer Health Workers). We thank them for their genuine heart and for their help to many needy people.

Our program has also formed a collaboration with the community-based healthcare centers known as "Posyandu" or Integrated Healthcare Centers. This partnership aims to provide assistance and enhance the well-being of underprivileged individuals in the community. In particular, our team has extended support to the dedicated volunteers known as 'Kader Posyandu' or volunteer health workers. We express our gratitude to these compassionate volunteers for their genuine dedication and for their invaluable contributions in helping numerous individuals in need. Their selfless efforts have made a significant difference in the lives of many vulnerable community members, and we are honored to have the opportunity to work alongside them in our mission to improve the welfare of the underprivileged.
