LOMBOK EARTHQUAKE 2018

In 2018, the neighboring island of Lombok experienced the devastating impact of two powerful earthquakes, resulting in a significant loss of life. The largest quake, measuring 6.9 magnitude, struck on August 5th and claimed the lives of over 460 people. It caused widespread destruction, flattening homes, mosques, and businesses, and displacing hundreds of thousands, including numerous tourists. The aftermath of the earthquake left Lombok grappling with extensive damages, estimated at more than 5 trillion rupiah (US\$342 million).

In response to this humanitarian crisis, Handara's CSR Program stepped forward to extend support to the victims. Recognizing the urgent need for assistance, we made a monetary donation to aid those affected by the earthquakes. The objective was to provide relief and contribute to the recovery efforts in Lombok, helping the community rebuild and recover from the devastating consequences of the earthquakes.
