

## SWAP PLASTIC WASTE FOR FOOD

As part of our commitment to sustainable practices, we have implemented a unique initiative called "Swap Plastic Waste for Food." This program aims to address two important issues: reducing plastic waste and providing food for those in need within the local community. In line with our mission, we not only distribute food but also offer educational resources on plastic detox to the community.

Our goal is to raise awareness about the detrimental effects of plastic waste and encourage responsible waste management practices. Through this program, our team has visited various areas and villages, exchanging "sembako" (daily necessities) and food for plastic waste. We are proud to share that, as of 2022, we have successfully distributed a total of [insert number] to those in need. We firmly believe that this initiative serves a dual purpose. Firstly, it helps meet the immediate needs of individuals and families who are facing food insecurity.

Secondly, it educates the local community about the importance of reducing plastic waste and fosters a sense of environmental responsibility. By providing food in exchange for plastic waste, we aim to encourage sustainable behavior and inspire long-term changes in waste management practices. We are hopeful that this program will not only improve the well-being of individuals but also contribute to a cleaner and healthier environment.

Together, we can make a difference in the lives of the needy while promoting sustainable practices and creating a better future for our community.
