YAYASAN SENYUM BALI

We also partnered up with Yayasan Senyum Bali, a local and independent non-profit organization dedicated to providing healthcare to individuals with craniofacial disabilities. Yayasan Senyum Bali focuses on delivering transparent and comprehensive services to patients, addressing various conditions such as cleft lip and palate, Goldenhar Syndrome, Apert Syndrome, and facial tumor. We firmly believe that every child born with a cleft lip or cleft palate deserves access to exceptional surgical care.

Without proper intervention, these conditions can have devastating consequences, including a high mortality rate and social stigmatization. As part of our CSR initiative, we have provided funding to the Senyum Bali Foundation to support the surgical operations required for children with cleft lip and palate. Our aim is to contribute to the improvement of their lives by enabling them to receive the necessary medical care and ultimately overcome the challenges associated with these conditions.
